Autopass

After listening closely to what our customers were saying, we identified that two areas which were causing transport companies problems in the UK & abroad were truck parking and washing.

The key problem was having to issue drivers with cash for these services, who cannot always be relied upon to return the receipts which are often poor quality and illegible for VAT reclaim.

As a result of listening to this feedback, Servitir has teamed up with a leading IT provider to develop a solution for this problem. Our Autopass Card is now accepted at various sites across the UK, Ireland & Belgium. There are plans to grow the network throughout 2010 which also includes international expansion across France, Spain & Germany too. We will keep you updated on any developments through this site.
